

兔抗 ALKBH1 多克隆抗体

中文名称：兔抗 ALKBH1 多克隆抗体

英文名称：Anti-ALKBH1 rabbit polyclonal antibody

别 名：ABH; ABH1; alkB; hABH; ALKBH

抗 原：ALKBH1

储 存：冷冻 (-20°C)

宿 主：Rabbit

相关类别：一抗

反应种属：Human, Mouse

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:	This gene encodes a homolog to the <i>E. coli</i> <i>alkB</i> gene product. The <i>E. coli</i> <i>alkB</i> protein is part of the adaptive response mechanism of DNA alkylation damage repair. It is involved in damage reversal by oxidative demethylation of 1-methyladenine and 3-methylcytosine.
Applications:	ELISA, WB
Name of antibody:	ALKBH1
Immunogen:	Fusion protein of human ALKBH1
Full name:	alkB homolog 1, histone H2A dioxygenase
Synonyms:	ABH; ABH1; alkB; hABH; ALKBH
SwissProt:	Q13686
ELISA Recommended dilution:	2000-5000

WB Predicted band size:	44 kDa
WB Positive control:	Mouse pancreas tissue
WB Recommended dilution:	500-2000
