技术规格

Background:	The protein encoded by this gene is involved in the synthesis of asparagine. This gene complements a mutation in the temperature-sensitive hamster mutant ts11, which blocks progression through the G1 phase of the cell cycle at nonpermissive temperature. Alternatively spliced transcript variants have been described for this gene.
Applications:	ELISA, WB, IHC
Name of antibody:	ASNS
Immunogen:	Fusion protein of human ASNS
Full name:	asparagine synthetase (glutamine-hydrolyzing)

IHC positive control:	Human colon cancer
IHC Recommend dilution:	50-200
WB Predicted band size:	64 kDa
WB Positive control:	Lovo and 231 cells
WB Recommended dilution:	500-2000
