CDKN2A 抗原

- 中文名称: CDKN2A 抗原
- 英文名称: CDKN2A Antigen
- 相关类别: 抗原
- 储 存: 冷冻(-20℃)

概述

Synthetic peptide corresponding to a region derived from 144-156 amino acids of human cyclin-dependent kinase inhibitor 2A

技术规格

Background	This gene generates several transcript variants which differ in their f irst exons. At least three alternatively spliced variants encoding disti nct proteins have been reported, two of which encode structurally r elated isoforms known to function as inhibitors of CDK4 kinase. The remaining transcript includes an alternate first exon located 20 Kb u pstream of the remainder of the gene; this transcript contains an al ternate open reading frame (ARF) that specifies a protein which is s tructurally unrelated to the products of the other variants. This ARF product functions as a stabilizer of the tumor suppressor protein p5 3 as it can interact with, and sequester, the E3 ubiquitin-protein lig ase MDM2, a protein responsible for the degradation of p53.
Gene Accession	NP_000068
Swissprot	P42771
Synonyms	ARF; MLM; P14; P16; P19; CMM2; INK4; MTS1; TP16; CDK4I; CDKN2; INK4A; MTS-1; P14ARF; P19ARF; P16INK4; P16INK4A; P16-INK4A
Full name	cyclin-dependent kinase inhibitor 2A
