

小鼠抗 HBB 单克隆抗体

中文名称： 小鼠抗 HBB 单克隆抗体

英文名称： Anti-HBB mouse monoclonal antibody

别 名： CD113t-C; beta-globin

相关类别： 一抗

储 存： 冷冻 (-20°C) 避光

宿 主： Mouse

抗 原： HBB

反应种属： Human

标 记 物： Unconjugate

克隆类型： mouse monoclonal

技术规格

Background:	The alpha (HBA) and beta (HBB) loci determine the structure of the 2 types of polypeptide chains in adult hemoglobin, Hb A. The normal adult hemoglobin tetramer consists of two alpha chains and two beta chains. Mutant beta globin causes sickle cell anemia. Absence of beta chain causes beta-zero-thalassemia. Reduced amounts of detectable beta globin causes beta-plus-thalassemia. The order of the genes in the beta-globin cluster is 5'-epsilon -- gamma-G -- gamma-A -- delta -- beta--3'.
Applications:	ELISA, WB, IHC
Name of antibody:	HBB
Immunogen:	human hemoglobin
Full name:	hemoglobin, beta

Synonyms :	CD113t-C; beta-globin
SwissProt:	P68871
ELISA Recommended dilution:	500-1000
WB Recommended dilution:	100-500
