

## IL11RA 抗原(重组蛋白)

中文名称: IL11RA 抗原(重组蛋白)

- 英文名称: IL11RA Antigen (Recombinant Protein)
- 储 存:冷冻(-20℃)
- 相关类别: 抗原

概述

Fusion protein corresponding to a region derived from 185-371 amino acids of human IL11RA

## 技术规格

Full name:	Interleukin-11 receptor subunit alpha
Synonyms:	CRSDA
Swissprot:	Q14626
Gene Accession:	BC003110
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	Interleukin 11 is a stromal cell-derived cytokine that belongs to a fa mily of pleiotropic and redundant cytokines that use the gp130 trans ducing subunit in their high affinity receptors. This gene encodes the IL-11 receptor, which is a member of the hematopoietic cytokine rec eptor family. This particular receptor is very similar to ciliary neurotro phic factor, since both contain an extracellular region with a 2-domai n structure composed of an immunoglobulin-like domain and a cyto kine receptor-like domain. Multiple alternatively spliced transcript vari ants have been found for this gene.
