

MED6 抗原（重组蛋白）

中文名称： MED6 抗原（重组蛋白）

英文名称： MED6 Antigen (Recombinant Protein)

别 名： ARC33; NY-REN-28

储 存： 冷冻（-20℃）

相关类别： 抗原

概述

Full length fusion protein

技术规格

Full name:	mediator complex subunit 6
Synonyms:	ARC33; NY-REN-28
Swissprot:	O75586
Gene Accession:	BC004106
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	Mediator of RNA polymerase II transcription subunit 6 is one of the subunits of the Mediator complex. It is an enzyme that in humans is encoded by the MED6 gene. Component of the Mediator complex, a coactivator involved in the regulated transcription of nearly all RNA polymerase II-dependent genes. Mediator functions as a bridge to convey information from gene-specific regulatory proteins to the basal RNA polymerase II transcription machinery.
