

兔抗 TNF 多克隆抗体

中文名称：兔抗 TNF 多克隆抗体

英文名称： Anti-TNF rabbit polyclonal antibody

别名： tumor necrosis factor; DIF; TNFA; TNFSF2; TNLG1F; TNF-alpha

抗原： TNF

储存： 冷冻（-20℃）

宿主： Rabbit

相关类别： 一抗

反应种属： Human, Mouse, Rat

标记物： Unconjugate

克隆类型： rabbit polyclonal

技术规格

Background:

This gene encodes a multifunctional proinflammatory cytokine that belongs to the tumor necrosis factor (TNF) superfamily. This cytokine is mainly secreted by macrophages. It can bind to, and thus functions through its receptors TNFRSF1A/TNFR1 and TNFRSF1B/TNFR. This cytokine is involved in the regulation of a wide spectrum of biological processes including cell proliferation, differentiation, apoptosis, lipid metabolism, and coagulation. This cytokine has been implicated in a variety of diseases, including autoimmune diseases, insulin resistance, and cancer. Knockout studies in mice also suggested the neuro

	protective function of this cytokine.
Applications:	ELISA, IHC
Name of antibody:	TNF
Immunogen:	Synthetic peptide of human TNF
Full name:	tumor necrosis factor
Synonyms:	DIF; TNFA; TNFSF2; TNLG1F; TNF-alpha
SwissProt:	P01375
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human colorectal cancerHuman liver cancer
IHC Recommend dilution:	20-100
